

6th World Congress on Ovulation Induction

Naples, Italy • 30 September - 2 October 2010

Ovulation Induction is a critical therapeutic procedure employed in the management of infertility, both alone and in conjunction with assisted reproduction procedures.

Since 1994 the World Congress on Ovulation Induction has become a key scientific event to update physicians and scientists on novel and ground-breaking approaches and techniques in this invaluable therapeutic area.

The 6th edition of the World Congress on Ovulation Induction will take place in Naples, Italy from the 30th of September to the 2nd of October, 2010. This beautiful city, close to unique venues such as the islands of Capri and Ischia and the archaeological sites of Pompeii and Herculaneum will be a perfect backdrop for this high-level scientific event. The Congress will be held at a central and convenient facility located on the Mediterranean seashore with a breathtaking view of the bay of Naples, its islands, and Mount Vesuvius.

We look forward to welcoming you in Naples in 2010.
